Rakayez Properties faced growing complexity in managing a diverse portfolio of residential, commercial, and industrial properties. Manual processes in contract tracking, rent collection, maintenance, and reporting led to operational inefficiencies, missed revenue, and delayed decision-making. A lack of centralized data and real-time visibility further hindered strategic planning and customer experience.

Challenges

- **Complex Property Structures:** Difficulty managing main/sub-properties across residential, commercial, and industrial categories.
- **Contract & Rent Inefficiencies:** Missed dues from poor tracking of draft, active, and expired contracts.
- **Data Overload:** No unified dashboards for sales, rent collections, and performance analytics.
- **Manual Maintenance & Invoicing:** Frequent delays and errors in task handling and billing.
- **Limited Reporting:** Inadequate reports hindering timely, informed decisions.

Solution & Impact

- **Centralized Property Management:** Unified platform for contracts, images, floor plans, and safety documents.
- **Real-Time Dashboards:** Instant insights into sales, rents, brokers, and property performance.
- **Automation of Contracts & Invoicing:** Auto reminders, invoicing, and renewal notifications.
- **Data Visualization:** Visual dashboards for property types, statuses, and financial summaries.
- **Smart Maintenance Integration:** Assign teams, track work hours, auto-generate accurate invoices.

BSEZ needed solution where a they can accommodate their Accounting module to solve advance payment, loan management and other basic accounting difficulties. Further they adopt Project module to track their daily operation and keep track of tasks which were handled manually.

Solution

- Automates accounting, loan management, and tax report generation
- Manages bills, invoices, payments, and reconciliations in one system.
- Reduces paperwork and eliminates manual approvals.
- Tracks regular operations across all departments.
- Ensures completion of recurrent tasks in the system.

Impact

- With the solution BSEZ has currently automated their regular accounting process. The tasks that were very difficult to handle through excel or any other manual process is now solved with few clicks. They automated their operation approval process in ERP. As a result, no manual communication for approval or task assigning is necessary now.

TECHNOLOGY

odoo

Purchase, Sales & Project management automation was in extreme time consuming and tedious job for them. They needed a solution where interconnection between these businesses were necessary.

Tracking over petty cash to entire project budgeting was essential to track down the expenses and ensure profitability of the company.

Advance Salary, Employee loan and Late attendance penalty was some HR feature that has been introduced to their ERP solution.

Solution

- Odoo ERP comes into play to solve the entire business process where every single module is a stand-alone business solution but interconnected as well.
- Odoo UAE localization for Accounting and Payroll gives an easy solution to track cater the business need of No1events.

Impact

- With the solution No1events has achieved exponential efficiency while maintaining events and expenses.
- Employee check-in/out time has been automated with attendance devices which ensure proper pay-slip generation

IDLC was facing difficulties with their meeting management as they don't have any automation process to store meeting minutes and process.

A solution product that has integration with different existing software solutions.

Tracking the meeting resolutions and their action items in a stand alone solution where they can follow-up the work progress.

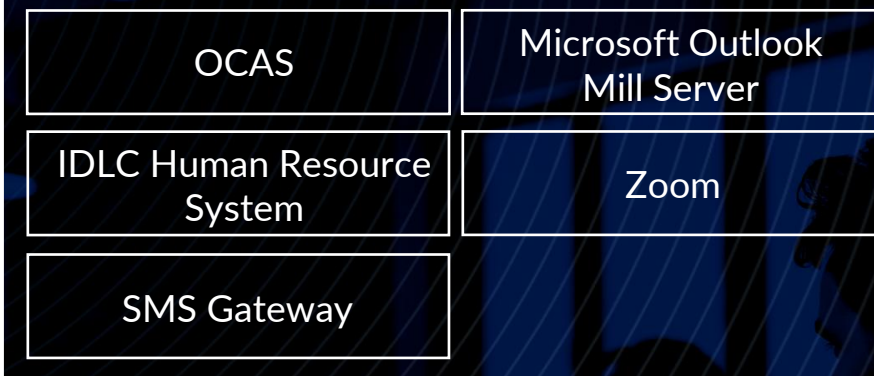

Solution

- Brain Station has come up with a dedicated Meeting minutes management solution using Odoo framework.
- Initiating zoom meeting with the solution and integration with other software as well which makes meeting management more convenient.

Impact

- With the solution IDLC has achieved a single solution where they can track calendar booking, send SMS, Send email invitation, track attendance and initiate zoom meeting.
- System is preparing a final Meeting minutes file which will be submitted to Bangladesh bank. Employee Data's are also handled in the system.

NEO VENTURES LIMITED (a Concern of Rahimafrooz)

Neo ventures limited has adopted Odoo to automate their Sales, Purchase, Inventory, Accounting process in operating their regular business process. They also automated the entire Mushok reports for a trading company as per Bangladesh government rules. This reporting helps them to reduce all their manual intervention when submitting the reports to the government.

Solution

- Automates accounting and sales processes.
- Generates all necessary Mushok reports for a trading company.
- Automates inventory valuation.
- Properly tracks product receipts, internal transfers, and delivery orders.
- Eliminates manual approval processes.

Impact

- With the solution, Neo Ventures Limited has currently automated its regular accounting process. It was very difficult for them to analyze their dealer wise sales, territory management, and incentive plans. After automation the entire company operation is running smoothly.
